CIRTIFICATION

[Programming Foundations with JavaScript, HTML and CSS](#) (Certificate from Coursera) **Duke University**

PROJECTS

Ecommerce – [GitHub](#) | [Live demo](#)

- This project is built using the MERN Stack and features a user-friendly dashboard. Users can easily manage all aspects of their account, and customers can efficiently find and purchase their desired products through the website.

ShobArtist (Client Work) – [Live demo](#)

- Developed the frontend of a modern dropshipping website using React, Bootstrap, Sass, and TailwindCSS, creating a sleek, responsive interface integrated with a Django backend for efficient performance.

Nature Lease a innovative solution – [GitHub](#)

- Experience a dynamic online marketplace powered by TypeScript, Tailwind CSS, Nest.js, and Next.js, seamlessly connecting buyers and sellers of farm-related products and land parcels. The platform features distinct user roles and a captivating landing page with farm equipment and land listings.

Blood Donation and Healthcare Platform – [GitHub](#)

- A comprehensive platform designed to facilitate blood donation and healthcare support with three user roles: Admin, Donor, and Receiver. Developed using ASP.NET for the backend and Next.js with Tailwind CSS for the frontend, it ensures seamless coordination and critical healthcare services.

More Project - Doctor Appointment System (Using C#) - [GitHub](#) **|| Campus Life(React) -** [GitHub](#) | [Live](#)

PROBLEM SOLVING

Leetcode- [Md Fahad Khan](#)
Resolve 200+ data structure and Algorithm problem on diverse online platforms
